

Animals With Altitude

Photographs of critters big and small connected with aviation are the subjects of Allan Janus' recent book *Animals Aloft*. Janus, an archivist at the National Air and Space Museum, will be a guest speaker at the EAA AirVenture Museum on April 20. As Cleo (the photographer's favorite feline) playfully points out, EAA also has a collection of animals with altitude in its scrapbooks.

Clyde Pangborn (kneeling), a performer for and co-owner of Gates Flying Circus, with Ivan Gates' German purebreds Heinie (short for Heinrich) and Judge in Monte Vista, Colorado (1923).

Aerobatic pilot Art Scholl enjoyed flying with his dog, Aileron, in *Super Chipmunk*. Scholl's de Havilland DHC-1B-2 Chipmunk (N1114V) flies inverted among other aerobatic planes in the EAA AirVenture Museum.

Pilot and EAAer Jill Schumacher sits with TriMo beside her cat's namesake, the EAA Ford Tri-Motor.
