

Model Mystery

The EAA AirVenture Museum recently acquired this small airplane. It looks like a child's homemade toy. The model airplane's description, however, says Lockheed used it in wind tunnel experiments. That's all we know.

If you know anything about this model airplane, its design, or the intention of the experiments, e-mail Editorial@EAA.org with EAA's Attic in the subject line or write to EAA's Attic at EAA, P.O. Box 3065, Oshkosh, WI 54903.

For those interested in wind tunnel testing, the museum will be hosting a NASA traveling exhibit containing a large collection of models used by the agency for wind tunnel tests during the last 70 years. The exhibit runs from May through November 2007. More details will be posted at www.AirventureMuseum.org as they become available.

For February's Mystery Answer visit www.AirventureMuseum.org/attic to read responses from your fellow members.
